## MUST DO

"You don't have to be great to start, but you have to start to be great." ZIG ZIGLAR

**Work out your life expectancy** — you can do this at [www.mylongevity.com](http://www.mylongevity.com)

**Make a list of your financial assets** — this would be property, cash, shares, superannuation etc. Don't include items such as cars and furniture.

**Make a list of additional resources that may become available during your retirement.** These should include any potential sources of extra income, as well as legacies that could reasonably be expected to come to you.

**Work out how much you expect to spend after you retire** — list all your expenditure — broken down into fixed, variable, and discretionary.

**Examine your expenditure and shop around to ensure you are getting the best deals** — including power, phone, internet, insurances, lending etc.

**Make a list of your goals** — for one week, one month, six months, 12 months, five years and 10 years.

**Use the pension tables that were handed out to work out if you might be eligible for a pension when you retire.**

Then go to Noel's website [www.noelwhittaker.com.au](http://www.noelwhittaker.com.au) to find out if the figures you initially calculated are realistic.

Don't forget that the income from financial assets such as bank accounts, superannuation and shares are calculated under the deeming rates which means you should use the Deeming calculator on the website before you go to the Age Pension calculator.

**Examine your financial assets,** to determine whether they are appropriate for your goals and your risk profile.

**Ensure you have a valid Will, Enduring Power of Attorney, and an Advanced Health Directive if appropriate.** Make sure you let your family know where these documents are kept.
